Skills & Tools

Full Stack Web Development · React · Node.js · PHP · AngularJS · JavaScript · REST APIs · CI/CD · GitHub · GitLab · Firebase · AWS · MySQL · Bootstrap · HTML/CSS · Agile · Scrum · Sprint Planning · Backlog Grooming · User Stories · UX/UI Collaboration · Automation Scripts · Technical Problem Solving · Cloud Hosting · DevOps Awareness · MVC Architecture · Deployment Pipelines

Experience

Freelance Developer

2022–Present – Contract & Independent Projects

Delivered a wide range of web and game-related projects with a focus on clean architecture, performance, and scalability. Experienced with full-stack development using React, Node.js, PHP, and modern JavaScript frameworks. Regularly work with REST APIs, automation scripts, cloud hosting (AWS, Firebase), and CI/CD workflows. Prioritize maintainability, intuitive UX, and cross-platform compatibility across projects. Comfortable owning deployments, managing infrastructure, and solving complex technical challenges at scale.

Full Stack Developer

2020–2022 – Mercy For Animals

Developed and maintained web systems supporting major campaigns and donor platforms using React.js, Node.js, PHP, MySQL, and JavaScript. Integrated marketing tools and CRMs, streamlining email workflows and improving data pipelines. Managed infrastructure across Linux and Windows Server environments, increasing reliability and operational efficiency.

Software Engineer

2018–2020 – MetrixSystems

Built and maintained custom web applications using AngularJS, Angular, and PHP. Helped migrate legacy projects to modern MVC architectures and created tools for automation, batch processing, and data scraping. Delivered scalable CMS implementations and improved internal workflows through smart tooling.

Web Developer

2016–2018 – Richard Photo Lab

Redesigned and supported the lab's e-commerce platform using PHP, JavaScript, and MySQL, improving performance and user experience. Integrated legacy systems with digital workflows and cloud storage. Built tools for film processing and improved the mobile UX. Managed server infrastructure with CentOS and cPanel.

Education

California State University, Channel Islands

2012– Bachelors of Science in Information Technology; minor in Computer Science
